In a jar $\frac{2}{7}$ marbles are green. If ~~there are~~

What is the probability that a marble is not green?

If there are 315 marbles in the jar, how many are green?

$$\frac{2}{7} = \frac{\quad}{315}$$

If there are 170 green marbles,
how many are there in total?

65°, 75°, 46°, 45°,

$$\frac{234 \times}{5} = 46.8 \text{ SS}$$

$$x = 44^\circ$$
